

Studio De Simone plans and/or organises courses and seminars on subjects such as safety at work and protection of the environment both for companies and inter-company settings (industry, services, Public Administration Offices, associations, schools, universities, trade unions etc.)

The intervention proposed for this type of training course may include:

- project and/or realise courses and/or seminars on safety at work and protection of the environment both for companies and other entities (for example industries, services, Public Administration offices, associations, schools, universities, trade unions, etc.)

Studio De Simone is involved in these projects in terms of: organisation, personnel management and planning.
